Workshop 1 – Spring REST [AMS Project]

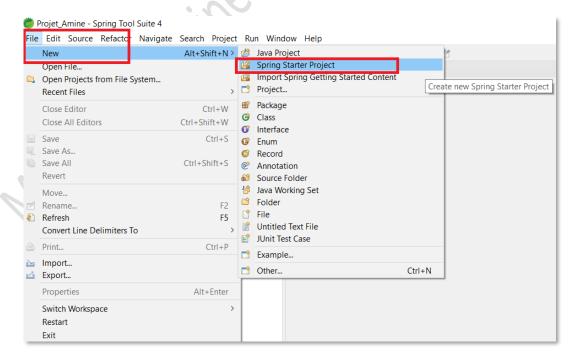

Les objectifs :

1)API Rest pour l'entité Provider 2)API rest pour l'entité Article

# Workshop 1 : AMS - Couche REST

- Dans cette section, on va présenter la partie backend du projet AMS. Les entités de ce projet sont Provider et Article.
- ➤ Dans le workshop 2, on va voir ensemble comment intégrer une maquette Angular bootstrap et faire également l'upload d'image.
- ➤ La couche « security » permettant d'assurer l'authentification et la gestion des utilisateurs et les rôles sera abordée dans le workshop 3.
- Le workshop 4 sera dédiée la partie JWT(Json Web Token).
- Le workshop 5 aura comme objectif le déploiement de l'application sur le cloud Heroku.
- ➤ En fin les workshops 6 et 7 seront respectivement une illustration sur l'image Docker de l'application et le pipeline Jenkins.

### 1-Creation d'un nouveau projet

Tel: +216 51 36 36 34

**Workshop 1** – Spring REST [AMS Project] **Les objectifs :** 

1)API Rest pour l'entité Provider 2)API rest pour l'entité Article

4-Créer les fichiers Provider.java(Entity: Java Class) ProviderRepository(Java Interface) et ProviderController(Java Class)

### 4.1-Provider.java

```
package com.sip.ams.entities;
import javax.persistence.Column;
import javax.persistence.Entity;
import javax.persistence.GeneratedValue;
import javax.persistence.GenerationType;
import javax.persistence.Id;
import javax.validation.constraints.NotBlank;
@Entity
public class Provider {
    @GeneratedValue(strategy = GenerationType.AUTO)
    private long id;
    @NotBlank(message = "Name is mandatory")
    @Column(name = "name")
    private String name;
    @NotBlank(message = "Address is mandatory")
    @Column(name = "address")
    private String address;
    @NotBlank(message = "Email is mandatory")
    @Column(name = "email")
    private String email;
```

Formation: FullStack SPRING-ANGULAR

Formateur: Dr.Ing Mohamed Amine MEZGHICH

Email: ma.mezghich@smart-it-partner.com

Tel: +216 51 36 36 34

Web site: <a href="https://smart-it-partner.com/">https://smart-it-partner.com/</a>

Linkedin: https://www.linkedin.com/in/mohamed-amine-

mezghich/

Formateur: Dr.Ing Mohamed Amine MEZGHICH

Email: ma.mezghich@smart-it-partner.com

Tel: +216 51 36 36 34

**Workshop 1** – *Spring REST [AMS Project]* **Les objectifs :** 

1)API Rest pour l'entité Provider 2)API rest pour l'entité Article

```
public Provider() {}
public Provider(String name, String address, String email) {
    this.name = name;
    this.address = address;
    this.email = email;
}
public void setId(long id) {
    this.id = id;
}
public long getId() {
    return id;
public void setName(String name) {
    this.name = name;
public String getName() {
    return name;
public void setEmail(String email) {
    this.email = email;
public String getEmail() {
    return email;
public void setAddress(String address) {
    this.address = address;
public String getAddress() {
    return address;
```

On peut vérifier que la table provider a été bien créée.
